

HEALTH INNOVATION JUNCTION WHERE IDEAS MEET IMPACT

DELEGATE PACK

18th June 2024
Eden Court, Inverness

WELCOME

A very warm welcome to Inverness and thank you for joining us for the Health Innovation Junction: Where Ideas Meet Impact.

In the morning we will have plenty of time for you to find out about each other through the Elevator Pitches and Speed Networking sessions and also a first chance to visit the exhibition / trade fair.

Following lunch, the Chief Executive for NHS Highland, Fiona Davies, will kick off the afternoon session which will involve 3 parallel sessions including some interesting presentations from our key note speakers, informative fireside chats hosted by Techscaler and a chance to meet our exhibitors.

Our event has a strong focus on networking so we encourage you to get involved in all the sessions and take the chance to speak to as many people as possible throughout the day.

Please note, there will be photographs taken throughout the day, so let us know in if you do not wish to be included in any media.

*Best Wishes,
Health Innovation Junction event team*

AGENDA

<u>Time</u>	<u>Title/ Presenter/Location</u>
09:30 – 10:15	Registration – Tea & Coffee – Hall
10:15 – 10:20	Welcome & Introductions – Hall

If lost, please contact the event organiser team in yellow t-shirts!

EVENT HOSTS

North of Scotland Innovation Hub:

The North of Scotland Innovation Hub is one of three regional innovation test beds in Scotland. Our vision is to support the development, evaluation and implementation of innovative solutions and products with the potential to transform health and social care delivery and address demographic, economic, and workforce challenges. Our aim is to take a collaborative approach to support the development, evaluation and implementation of innovation across the six boards in the North of Scotland.

UHI, Life Sciences Innovation:

Helping students, staff, and businesses develop their innovations from concept to commercialisation. Life sciences innovation is about making a positive impact on people's lives. As part of the Faculty of Health, Science and the Environment, we work with businesses, staff and students to help turn ideas into new businesses and technologies. Whether you want to solve a problem by creating a business, or are simply interested in learning about innovation, we're here to help.

Highlands and Islands Enterprise (HIE):

HIE provide advice and support on Research and development; Developing new products and services; Improving productivity; Identifying new opportunities for businesses to explore; Developing a strategy for future innovation and Protecting intellectual assets. We can also help part-fund innovation/research and development projects, depending on the nature and risk of the project.

Techscaler / Codebase:

Techscaler is a Scottish Government programme proudly delivered by CodeBase Ltd which aims to support tech founders to scale-up their businesses by accessing advice and mentorship from industry experts.

KEY NOTE SPEAKERS

Chris Helson - Co-Founder Tiny Air Limited

Chris is a designer and engineer, and a founding director of Tiny Air Limited. Tiny Air is a purpose driven company that was established to design and develop products that mitigate environmentally damaging practices within surgical decontamination. Chris has run his own business since 1994 and been a partner at Helson and Jackets since 1999. He has considerable experience creating, producing and delivering projects for a range of clients. Helson and Jackets are new media artists and invented a 360 video hologram www.io360.co which was released in July 2018. This system won awards from Scottish EDGE, SMART Scotland, New Media Scotland, and Helson and Jackets were awarded Inventor of The Year 2019 at the AFRC Made in Scotland Awards. Chris trained and worked in Engineering for 7 years building industrial jet engines and turbochargers with GEC until 1988.

Douglas Adam, Senior Manager for Innovation & Business Development at BT SWAN

Experienced ICT/Telco professional with a successful demonstrated history of working in the information technology/telco industry across the UK Public & Private Sector and Ireland. Skilled in Professional Services, Management, Modern Workplace, Digital Transformation, Microsoft Productivity Solutions, Software as a Service (SaaS), Mobility and Business Alliances. Strong networking expertise and experience of outcome based projects

KEY NOTE SPEAKERS

Hazel Dempsey, Innovation Programme Manager – North of Scotland Innovation Hub

Hazel has a background in both adult nursing and public health programmes and joined NHS Grampian in 2003. Hazel brings expertise in programme management and enthusiasm for delivering supporting creative, technological solutions to healthcare challenges.

The role of Innovation Programme Manager is multi-faceted which contributes to the delivery of innovation programmes and projects in the North of Scotland Region. Day to day, Hazel liaises and collaborates with a wide range of clinical and management staff throughout the NHS, academics, industry representatives, and innovation bodies.

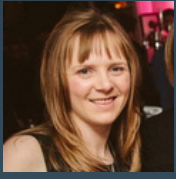

Colin Fleming is a Consultant Dermatologist, Mohs' Surgeon, Honorary Professor of Dermatology and is based at Ninewells Hospital and Medical School, Dundee.

He was an undergraduate at Glasgow University where he also studied for a BSc(Honours) in Immunology, and subsequently developed an interest in skin cancer research and treatment through working in Australia, Glasgow and Lisbon.

He has been a Consultant in Dundee since 1999 and has set up multiple services for skin cancer patients, including the NOSCAN Macmillan Mohs service. He has research interests in diagnosis and treatment of skin cancer, and has over 90 publications in skin cancer, skin surgery and general dermatology. He has been a leading proponent of dermoscopy in the UK for the last 25 years. He is a former President of the British Society of Dermatological Surgery, former President of the Scottish Dermatology Society, and was Operational Medical Director in NHS Tayside 2018-2021. He is NHS Tayside Director of Innovation Tayside, co-director of the Tayside Innovation MedTech Ecosystem (TIME) and research lead of the NHS Scotland AI skin cancer consortium, which seeks to establish diagnosis by AI of skin cancer in Scotland within 25 minutes by 2025.

KEY NOTE SPEAKERS

Karen Skene, Senior Innovation Manager at Highlands and Islands Enterprise

Karen is an experienced Project Manager with a background in scientific research.

Nicola Carey Nicola is Professor of Health Services Research at UHI

A qualified nurse who has worked in a variety of posts across the country in primary care as both a practice nurse and nurse practitioner. She also spent two years in the United States whilst undertaking her Master's in Public Health in community health education and was involved in several national and state level projects including the Youth Risk Behaviour Survey. Her research interests include quality improvement, workforce development, non-medical prescribing and patient self-management. She has significant experience in the conduct and management of multi-site studies and mixed methods research.

She has also previously worked as a member of the HTA pharmaceutical panel and the NIHR grant awarding body Research for Patients Benefit (RfPB) and is Vice-Chair for the Association of Prescribers.

Trish Gorely is Professor of Physical Activity for Health at UHI

Her main research interests are in psychological and behavioural aspects of physical activity, sedentary behaviour and health. My work is underpinned by behavioural epidemiology and has focused on health outcomes, physical activity and sedentary behaviour measurement, understanding the correlates of these behaviours and the design and evaluation of behaviour change interventions. She has been involved in a number of randomised controlled trials of behaviour change interventions. Populations she has worked with include children and adolescents, young adults, individuals at high risk of type 2 diabetes, older adults, and adults with peripheral arterial disease. She has received funding from the Medical research Council, NIHR, government departments, health charities and commercial partners.

EXHIBITORS

The DataLab:

At The Data Lab, we believe in a thriving, connected society powered by data and AI – where cross-sector conversations, creativity, and collaboration ignite and sustain the sparks of ground-breaking ideas, products and societal advances. We're uniquely positioned to support and incubate responsible innovation in data and AI across the public, private and academic sectors. We work with students, professionals, universities and colleges, business and our wider community to build a stronger and more collaborative economy and future for Scotland and the world.

ANRA Technologies:

ANRA Technologies is a leading international provider of end-to-end drone operations and traffic management system for unmanned system operators and airspace managers. ANRA offers intelligent and modular traffic management software capabilities as part of the service family for UAS Traffic Management (UTM) and Urban Air Mobility (UAM) operations.

Highlands and Islands Enterprise:

HIE provide advice and support on Research and development; Developing new products and services; Improving productivity; Identifying new opportunities for businesses to explore; Developing a strategy for future innovation and Protecting intellectual assets. We can also help part-fund innovation/research and development projects, depending on the nature and risk of the project.

TL Tech Smart Home Solutions:

TL Tech is an Aberdeenshire-based home automation specialist that designs, installs and maintains smart home systems using affordable hardware combined with clever tech know-how to integrate the functions people need in their home. Our mission is to create a world where Smart Meets Kind®, empowering people regardless of age, technical ability or finances to adopt digital solutions and transform lives by creating a unique caring and entertaining home environment. Explore the world of smart home technology and voice assistants. Create your very own smart home, discover eco-friendly smart home insights and learn about the work that we're doing with housing associations and community groups to support wellbeing with tech.

EXHIBITORS

M2M Cloud:

Neptune is a low maintenance, accurate, easy to install remote water monitoring solution, saving time, money and carbon emissions when compared to a manual monitoring approach. Neptune allows attention to be prioritised where it is most required thereby facilitating a more proactive approach to water system monitoring.

Memory Tracks Ltd:

Memory Tracks Ltd develop care platforms that link memorable music to daily care tasks and activities for people living with cognitive challenges, or neurodiversity.

Digital Health & Care Innovation Centre:

Hosted by the University of Strathclyde and in partnership with the Glasgow School of Art, the Digital Health and Care Innovation Centre (DHI) is one of Scotland's seven Innovation Centres. DHI seeks and supports new digital technologies for the health and care of the citizens of Scotland and beyond with our mission to help our population live longer and healthier lives, whilst boosting the economy. We play a pivotal role in supporting collaboration to co-design person-centred digital health and care solutions while advancing service, technical and business readiness.

North of Scotland KTP Centre:

The Knowledge Transfer Partnership programme, funded by Innovate UK, has been helping UK businesses collaborate with academic partners to innovate for business growth for almost 50 years, connecting businesses, not-for-profit and public sector organisations that have an innovation idea with the academic expertise to help deliver it. The North of Scotland KTP Centre works closely with the partnership teams to support the full KTP project lifecycle, from proposal development and submission through to project administration and reporting. Come and speak to us to find out how KTPs can help your organisation grow.

EXHIBITORS

Innovate UK/UKRI ICURE Programme:

Innovate UK ICURE is a pre-accelerator programme for researchers. Innovation-to-Commercialisation of University Research” (ICURE) is the UK's leading early stage research accelerator programme. It guides researchers through the process of refining and validating the commercial potential for some of the world's leading-edge science, technology and knowledge assets. This programme is designed to help explore the commercial application and potential of UK research. Within the ICURE programme, we have developed a range of funding and commercialisation training with industry experts, and this is delivered via our 4 key programmes; ICURE Engage, ICURE Discover, ICURE Explore and ICURE Exploit.

Interface:

Interface operates throughout Scotland, with a dedicated team for the Highlands and Islands. We are publicly-funded to offer a free service to match up individuals, organisations and companies with any of Scotland's universities to undertake a project that will benefit your business. We have matched up 100s of Highlands and Islands businesses with a willing university, keen to take on interesting projects and to learn from the direct contact with the working world. If projects have a cost attached (many are free) we administer a small suite of funding schemes that can cover the costs. We're happy to have an informal chat anytime to see if we can be of help.

InnoScot Health Limited:

InnoScot Health Limited was established in 2002 as NHS Scotland's formal innovation and commercialisation partner. We seek to inspire, accelerate, and commercialise impactful healthcare innovations. Working with staff across a range of roles and medical specialties, we have formed seven spin-out companies and brought a range of medical devices, products and technologies to market through outlicensing and direct sales.

EXHIBITORS

Practest:

Practest is a digital platform for primary care settings designed to enable GP's and practice staff to refocus on patient care. It does this by unlocking the hundreds of hours spent on inefficient processes and cumbersome patient communication systems.

Soulful Tech Solutions Ltd / End Well Care:

Building the world's first AI backed comprehensive solution to empower safe care at home for chronic ailments

LumiraDX:

LumiraDX is transforming community-based healthcare by providing fast, accurate and comprehensive diagnostic information at the point of care, enabling better medical decisions that lead to improved outcomes at a lower cost. The company's innovative LumiraDX Platform is designed to perform a broad menu of tests including infectious disease, cardiovascular disease, diabetes, and coagulation disorders and deliver lab-comparable performance with results in less than 12 minutes. Founded in 2014, LumiraDX is based in the UK with R&D and manufacturing sites across the US and Europe. For more information, please visit www.lumiradx.com.

Insource:

Insource delivers operational and data management solutions to both NHS and private UK healthcare providers and addresses the data unification and data accessibility challenges facing providers globally. With over 20 years' expertise we currently work with most national NHS government bodies and over 60 NHS Trusts and Health Boards assisting with their data management, planning, and reporting challenges.

UHI / Centre for Rural Health Sciences:

Nursing - Adult and ME, Scottish Rural Health Hub

EXHIBITORS

4c Engineering:

4c Engineering is a creative technology development consultancy based in Inverness, helping others to develop and de-risk their ideas, at any stage from concept through to commercial product. We have a strong record in design, technical problem solving, and prototyping

iDE8:

Medical Device Consultancy – Supporting businesses in B2B outsourced services. Services and technology available for licence

NHS Highland HSCP:

NHS Highland's Technology Enabled Care (TEC) team promotes the use of technology to provide health and care services to people in their own homes or nearby, helping them live independently and safely. The team delivers telecare and innovative solutions to support individuals' independence, as well as offering Near Me video consultations and Connect Me, a remote health monitoring service.

CAELUS/University of Strathclyde:

The University of Strathclyde is part of project CAELUS with the vision to develop a large network of drones delivery healthcare. The team at Strathclyde has been developing a digital twin (SHEPHERD) of the network of drones to design and operate the drones over Scotland.

AICE:

AI-Supported Image Analysis in Large Bowel Camera Capsule Endoscopy (AICE), a transformative digital health project funded by Horizon Europe, led by a dynamic partnership of researchers and experts across 12 European organisations. We have harnessed industry-leading artificial intelligence (AI) to make the patient pathway more effective for the Camera Capsule Endoscopy (CCE): a small, pill-shaped capsule equipped with a camera that, when ingested, captures tens of thousands of pictures of the colon to screen for cancer. <https://aiceproject.eu/>
